

Partnering Essentials[™]

HOW TO PARTNER AND GET RESULTS

2 DAY PROGRAM

Next Generation, Memorial Drive, North Adelaide
South Australia

6 & 7 March 2018

Why Partner?

The world today presents constant changes and challenges. Competing demands for resources, economic uncertainties and complex social and environmental issues all call for a new response.

More and more we see business, government, education and community organisations embrace cross sector partnering to provide innovative solutions and unlock creativity. It brings diverse knowledge, skills, networks and resources to the table.

Whether it be part of a Collective Impact, Shared Value or Impact Investing initiative, or a need to utilise resources better and to do more with less, knowledge of how to partner and the right skill set are the key to getting results.

Yet many people and organisations struggle to partner successfully, not for lack of good intentions but because effective cross sector partnering requires particular skills, knowledge, processes and actions.
